Competent Authority: Brummer Multi-Strategy AB is authorised in Sweden and regulated by Finansinspektionen, Swedish Financial Supervisory Authority.
PRIIP Manufacturer Website: brummer.se
Telephone: +46 8 566 214 80

This key information document is accurate as at 9 April 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

Type

Brummer Multi-Strategy 2xL (from "2x Leverage", "the Fund") is a multi-strategy fund offering a leveraged investment in the Brummer Multi-Strategy fund. The leverage ratio is approximately 2, i.e. for each krona invested in the Fund, the Fund borrows 1 krona and an exposure of approximately 2 kronor is created. As an alternative, the Fund may achieve the equivalent exposure through a derivative agreement. On the loan, or the equivalent, the Fund pays interest.

Brummer Multi-Strategy 2xL is a special fund which i.a. means that it can have a more flexible investment mandate. Assets of the Fund may be invested in transferable fixed income securities, money market instruments, derivative instruments (as part of the Fund's investment strategy), fund units as well as in deposits with credit institutions.

The Fund pays no dividend. Subscriptions and redemptions of units can be made on a monthly basis.

Strategy

Brummer Multi-Strategy 2xL's goal is to, over time, achieve a positive return regardless of market conditions (absolute return) that is not expected to correlate with traditional asset classes equities and bonds.

Brummer Multi-Strategy 2xL is a special fund which makes a leveraged investment in the special feeder fund Brummer Multi-Strategy, which in turn invests in the special master fund Brummer Multi-Strategy Master. The latter is actively managed and invests in hedge funds managed by investment managers within Brummer & Partners. The constituent funds are managed by different portfolio management teams, who operate independently of each other and pursue different investment strategies. The Master Fund's invest-

ments in hedge funds within Brummer & Partners are based on the judgement of whether they will improve the Fund's possibilities to reach its targets.

Neither the Fund, the feeder fund nor the Master Fund is managed with reference to a benchmark index. Any market indices included in the Fund's marketing materials shall not be used when evaluating the Fund's performance in relation to its return target. The objective is further to deliver a competitive risk-adjusted return compared with traditional asset classes and effective diversification of risk.

Intended Investor

This fund may be suitable for savers who plan to hold their investment for at least 5 years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no guarantee that the entire capital invested can be returned. No special knowledge or experience in special funds or financial markets is required to invest in the fund.

Other

The Fund's depositary is Skandinaviska Enskilda Banken AB (publ).

Detailed information about the Fund and the Master Fund is provided in the funds' information memoranda, containing the fund rules, and in the Fund's annual and semi-annual reports. All information is free of charge and is available on the website: brummer.se.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator (SRI) is a guide to the level of risk of the Fund compared to other funds. It shows how likely it is that the Fund will lose money because of movements in the markets. The summary risk indicator assumes that you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified the Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. Risks that are not reflected in the SRI (e.g. liquidity risks, counterparty risks and sustainability risks), but which can affect the Fund's value, are described in the Fund's Information Memorandum

The Fund does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the Fund itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation which may also affect how much you get back.

What you will get from the Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The calculations underlying the performance scenarios are mandated by the PRIIPs Regulation.

Performance Scenarios: Investment SEK 100,000

Scenarios		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	<i>What you might get after costs (SEK)</i>	69,200	59,800
	<i>Average return each year</i>	-30.78 %	-9.78 %
Unfavourable	<i>What you might get after costs (SEK)</i>	86,800	90,500
	<i>Average return each year</i>	-13.20 %	-1.97 %
Moderate	<i>What you might get after costs (SEK)</i>	103,500	126,300
	<i>Average return each year</i>	3.50 %	4.78 %
Favourable	<i>What you might get after costs (SEK)</i>	133,800	147,400
	<i>Average return each year</i>	33.76 %	8.07 %

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between October 2022 and February 2024.

Moderate scenario: This type of scenario occurred for an investment between March 2018 and March 2023.

Favourable scenario: This type of scenario occurred for an investment between May 2016 and May 2021.

WHAT HAPPENS IF BRUMMER MULTI-STRATEGY IS UNABLE TO PAY OUT?

The assets of the Fund and the manufacturer are ringfenced so the default of the manufacturer should not affect the Fund's ability to pay out. With respect to Skandinaviska Enskilda Banken (publ) as Depositary of the Fund to whom safekeeping of assets have been delegated, there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited by the rules which require segregation of assets of the Depositary and the Fund. The Depositary shall be liable to the Fund for its negligent or intentional failure to properly fulfil its functions.

WHAT ARE THE COSTS?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario
- SEK 100,000 is invested

Costs over time:

Investment SEK 100,000	If you exit after 1 year	If you exit after 5 years
Total cost (SEK)	9,853	58,273
Annual cost impact (*)	7.64 %	8.40 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.18 % before costs and 4.78 % after costs.

Presentation of cost

- The amounts shown here are the cumulative costs of the Fund itself, for two different holding periods. They include potential early exit penalties. The figures are estimates and may change in the future.
- The person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
- These figures include the maximum distribution fee that the person selling you the Fund may charge. This person will inform you of the actual distribution fee.

Composition of costs* (the amounts in SEK are based on an investment of SEK 100,000)

One-off costs for subscriptions or redemptions		If you exit after 1 year
Entry costs	We do not charge a subscription fee, but the person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.	SEK 0
Exit costs	We do not charge any redemption fee for the Fund, but the person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.	SEK 0
Ongoing costs		
Management fees and other administration or operation costs	We do not charge any management fee for the Fund. The Master Fund is however charged for management fee and other costs by the underlying strategies. This is an estimate based on actual costs over the last year.	SEK 7,663
Transaction costs	2.46 % of the value of your investment per year. This is an indicative amount when buying and selling investments of the Fund and may differ in practice depending on how much we buy and sell.	SEK 2,459
Additional costs charged in special circumstances		
Performance fee	We do not charge any performance fee in the Fund. The underlying strategies however typically charge 20 per cent of the total return that is in excess of the hurdle on the Master Fund's investment. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	SEK 0

* The data relates to Brummer Multi-Strategy 2xL as at 31 December 2023. Each calculation period runs for a 12 month period to 31 December of each year. Please refer to your broker, financial adviser or distributor for the actual charges (including any taxes).

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?**Recommended holding period: 5 years**

The Fund has no required minimum holding period but it is designed for long term investment; you should be prepared to stay invested for at least 5 years. The Fund targets an absolute return, however, due to normal market fluctuations and potential unexpected events, a longer investment horizon allows for the Fund to perform even if the holding period should include drawdowns.

There is no redemption fee charged.

For the impact of cashing in earlier than on the recommended holding period, please see the performance scenarios shown under "What are the risks and what could I get in return?" above.

HOW CAN I COMPLAIN?

Any complaints concerning the conduct of your distribution agent or investment advisor should be addressed to that distribution agent or investment advisor, with a copy to B & P Fund Services AB, using the contact details specified below.

Any complaints concerning the Fund itself or the conduct of the management company, should be addressed in writing to:

B & P Fundservices AB, Box 7030, SE-103 86 Stockholm, or email klagomalsansvarig@brummer.se (website: www.brummer.se/klagomal).
