

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Contour Tech Equity

a sub-fund of Schroder GAIA SICAV

Class C Accumulation SEK Hedged (LU1820063789)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide a positive return after fees have been deducted over a three year period by investing in equities worldwide, including emerging markets.

Investment policy

The fund is actively managed and invests in both long and short positions in equities of companies in or connected to the technology, media and telecommunications sectors.

The fund invests directly by purchasing physical holdings and/or indirectly through derivatives. The fund may be net long or net short when long and short positions are combined. The fund may use derivatives extensively, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may use leverage.

The fund may invest up to 10% of its assets in open ended investment funds. The fund may exceptionally hold up to 100% of its assets in cash.

Recommendation: Investors should seek independent advice and satisfy themselves that they have an understanding of the techniques employed by the investment manager.

Benchmark

The fund's performance should be assessed against its target benchmark,

being to provide a positive return over a three year period and compared against the S&P 500 Net TR index. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap directly or indirectly to a limited extent with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark. The target benchmark has been selected because the target return of the fund is to deliver the return of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

Dealing frequency

You can buy and sell shares weekly on Wednesday (or the next business day if a Wednesday is not a business day) and on the last business day in a month.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Currency risk/hedged share class: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated

with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

One-off charges taken before or after you invest

Entry charge 1.00%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges 1.71%

Charges taken from the fund under certain specific conditions

Performance fee

Subject to the "high water mark" principle, 20.00% of the share class positive performance. See the prospectus for more details. In the fund's last financial year the performance fee was 2.50% of the fund.

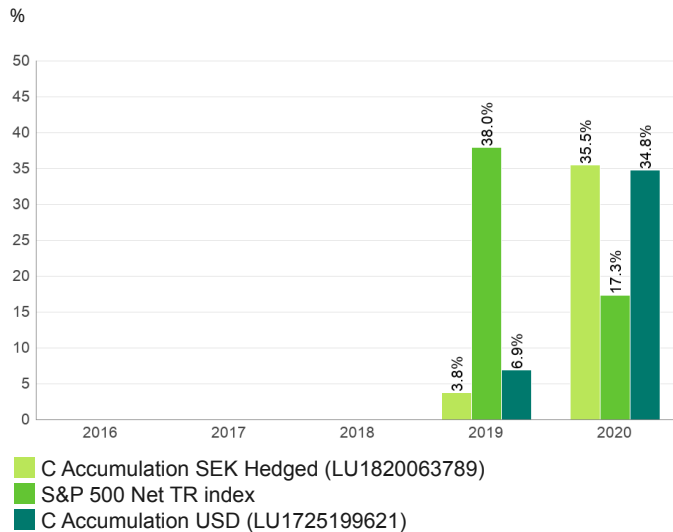

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2020 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in Swedish kroner after the ongoing charges, the portfolio transaction costs and the performance fee have been paid. Entry charges are excluded from calculations of past performance. The Benchmark performance is shown in the base currency of the fund.

The fund was launched on 20 December 2017.

The shareclass was launched on 30 May 2018.

Performance figures are only available since the launch of the respective share class.

Practical information
